

Undergraduate Research Opportunity Starr Global Change Ecology Lab

University of Alabama

Summer 2023 and beyond!

- Experience field research and techniques at Savannah River National Laboratory near Aiken, SC
- Upland longleaf and loblolly pine ecosystems
- Our research involves utilizing eddy-covariance towers measuring ecosystem C and energy fluxes, tree measurements, litterfall, soil respiration and more!
- ~20 hrs/ week, can vary with fieldwork and sample processing in lab
- Paid positions available!

Interested in our research or want to learn more about our projects visit starlab.ua.edu or contact Dr. Gregory Starr (gstarr@ua.edu)
